

FAST 8.9 Upgrade 2007

Changes You Can Expect with Budget Checking

What should I do if a warning message pops up when doing a budget check on a requisition?

Throughout the system, if a transaction runs through the budget checking process for two minutes without completing, the system will display a dialog box (see box below). The dialog box is a warning message and not an error.

Do not duplicate the transaction!

The system is indicating that budget checking will continue to run in the background. The user will not be required to remain on the page until the process completes. You will now have the flexibility to create a new transaction or initiate other functions.

The next budget checking transaction will be queued in the order requested. The maximum wait time is currently set at 2 (two) minutes.

There are a few simple steps to follow if you want to monitor the budget checking process:

If the Maximum Wait Time message appears, budget checking can be monitored on the Process Monitor.

The navigation to the Process Monitor is: PeopleTools > Process Scheduler > Process Monitor

The Run Status may read "Success" or "Warning." Both mean the process was successful but Warning indicates either a budget check warning or budget check error on the transaction.

Click on the Details Link.
